## 8. Portfolio Strategy

You can choose among the following four asset allocation strategies:

- i. Target Asset Allocation Strategy
- ii. Trigger Portfolio Strategy 2
- iii. LifeCycle based Portfolio Strategy 2
- iv. Fixed Portfolio Strategy

You may opt into or out of a Portfolio Strategy during the Policy Term. You can only have your funds in one of the Portfolio strategies at any point in time. Nominee/ Appointee (as applicable) can also exercise this feature post death of the Life Assured while the Smart Benefit is applicable

**i. Target Asset Allocation Strategy** Under this strategy, You can allocate the premiums between any two funds available with this Policy in a proportion of Your choice. Every quarter, units shall be rebalanced as necessary to maintain the proportions of the Funds as chosen at strategy inception. The re-balancing of units shall be done on the last day of each Policy quarter. If the last day of the Policy quarter is a non-valuation date then the next working day's NAV will be applicable.

### ii. Trigger Portfolio Strategy 2

Under this strategy, Your investments will initially be distributed between two funds - Multi Cap Growth Fund, an equity oriented fund, and Income Fund, a debt oriented fund - in a 75%:25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a trigger event.

Working of the strategy: a. The trigger event is defined as a 10% upward or downward movement in NAV of Multi Cap Growth Fund, since the previous rebalancing. For determining the first trigger event, the movement of 10% in NAV of Multi Cap Growth Fund will be measured vis-à-vis the NAV on the date of allocation of units at inception as the reference. b. On the occurrence of the trigger event, any fund value in Multi Cap Growth Fund which is in excess of three times the Fund Value in Income Fund, is transferred to the liquid fund - Money Market Fund by cancellation of appropriate units from the Multi Cap Growth Fund. This ensures that gains are capitalized, while maintaining the asset allocation between Multi Cap Growth Fund and Income Fund in the proportion of 75%:25%. c. If Fund Value in Multi Cap Growth Fund does not exceed three times the Fund Value in Income Fund, funds in Multi Cap Growth Fund, Income Fund and Money Market Fund are redistributed in Multi Cap Growth Fund and Income Fund in 75:25 proportion. iii. LifeCycle-based Portfolio Strategy 2 a. Under this strategy, the Company's Multi Cap Growth Fund will be used for equity exposure and the Income Fund for debt exposure. b. The Fund Value will be allocated to the Multi Cap Growth and Income Fund as per the Life Assured's age as described in the following schedule.

Age (Last birthday)	Multi Cap Growth Fund	Income Fund
0 – 25	80%	20%
26 – 35	75%	25%
36 - 45	65%	35%
46 – 55	55%	45%
56 – 65	45%	55%
66+	35%	65%

Under this strategy, You have the option to make Partial Withdrawals. Partial Withdrawals and different growth rates of the Multi Cap Growth and Income Fund may cause the actual fund weightings to differ from the above schedule. Since the objective is to allocate assets based on risk appetite at the current age, the Policyholder funds will be regularly rebalanced to achieve the above allocations. This will be done by automatic switching of units between the two funds at every Policy quarter.

During the last ten quarters of the Policy term, the exposure in the Multi Cap Growth Fund will be systematically reduced as per the Life Assured's age as described in the table below by automatic switches to the Income Fund. This is done so that the Fund Value at the time of maturity is not adversely affected by short term volatility in the equity market that Multi Cap Growth Fund invests in.

Age (Last birthday)	Multi Cap Growth Fund	Exposure in the last ten quarters prior to maturity										
		10	9	8	7	6	5	4	3	2	1
